SUMMARY

Full Stack Developer | WordPress Developer

Skilled Full Stack Developer with a strong foundation in both front-end and back-end technologies. Proficient in developing scalable web applications using modern frameworks like React, Node.js, and Express, with experience in API integration and database management (SQL & NoSQL). As an Instructor, demonstrated ability to simplify complex technical concepts, mentor students, and deliver engaging lessons in web development, JavaScript, and full stack engineering. Passionate about clean code, continuous learning, and building impactful digital solutions.

WORK EXPERIENCE

Wordpress Developer in Wise College   May 2023 - Feb 2024

- Taught practical and project-based WordPress development to students, covering topics such as theme customization, plugin integration, website optimization, and content management. Guided students in building fully functional websites, focusing on real-world applications and client requirements.
- Emphasized responsive design, SEO best practices, and usability. Played a key role in improving student employability by delivering industry-relevant training and hands-on experience.

Full Stack Developer in Wise Tech   March 2024 - Sep 2024

- Full Stack Developer with hands-on experience in designing, developing, and deploying web and mobile applications.
- Proficient in frontend technologies (HTML, CSS, JavaScript, React, React Native, Bootstrap) and backend development (Node.js, Python, PHP). Skilled in database management (MySQL, MongoDB) and API integration to deliver scalable and user-friendly solutions.
- Strong problem-solving abilities, with a focus on clean code, responsive design, and performance optimization.
- Passionate about building innovative digital products and continuously learning new technologies to stay ahead in the industry.

Web Developer in Vital Digital Marketing   Oct 2024 - Countinue

- Developed and maintained responsive, SEO-friendly websites for clients across various industries. Collaborated with the design and marketing teams to build customized websites using HTML, CSS, JavaScript, WordPress, and other CMS platforms.
- Converted UI/UX designs into functional, user-friendly websites.
- Integrated third-party APIs, optimized website performance, and ensured cross-browser compatibility.
- Handled website updates, troubleshooting, and security implementations.
- Assisted in developing landing pages, e-commerce sites, and portfolio websites aligned with digital marketing strategies.
- Contributed to improving client engagement through performance optimization and mobile-first development practices.

ALI RAZA

BSCS Bachelor of Science in Computer Science

Virtual University of Pakistan, Lahore

- Strong coding skills in various programming languages & familiarity with software development
- Ability to analyze complex problems, design efficient algorithms, and effective solutions.

Diploma in Data Analysis using Python

Wise Institute of Employabailty skill, Lahore

- Learned data ingestion, storage, processing, & analysis techniques using distributed computing.
- Worked with databases MongoDB and Cassandra for handling large-scale data efficiently.

Skill Sets

- HTML5, CSS, JavaScript, ReactJS, Tailwinds, Bootstraps, Python, Django, Canva, Desiging, MicroSoft Office, IT Management & Strategy, Responsive Web Design, Cross-Browser Compatibility, MySQL, PostgreSQL, MongoDB, Custom Theme & Plugin Development WooCommerce, Elementor, WPBakery
- **Languages:** English, Urdu.
- **Certifications:** Basic I.T, Diploma in Data Analysis using Python, Programing Essentials in C++,

PROJECTS

1. Ecommerce Website

Designed a responsive React UI with product listing, filters, product detail pages, shopping cart, and user authentication. Developed RESTful APIs in Django (Django REST Framework) to handle product data, user management, orders, and payments. Integrated JWT authentication for secure user login and role-based access control (admin vs. customer).

2. Portfolio Website for Companies

Included interactive elements such as project previews, contact form, and resume download option. Developed using React.js (or WordPress/Bootstrap, depending on your tech stack). Focused on SEO, fast loading speed, and cross-device compatibility.

3. Admission Website

Enabled students to apply online with features like form validation, document uploads, and automated confirmation emails. Included admin dashboard for managing applications, tracking status, and exporting applicant data. Built using HTML, CSS, JavaScript, and PHP/MySQL (or specify your tech stack). Optimized for mobile responsiveness and integrated with Google reCAPTCHA for spam protection.

4. Airline Management System

Designed an interactive dashboard for managing flight status, seat availability, and pricing updates. Integrated RESTful APIs for real-time flight data updates and third-party booking systems. Built using React.js, Node.js, Express, and MongoDB with a responsive UI for seamless user experience.

5. Process Management System

Developed a workflow automation platform to streamline business processes and improve operational efficiency.Designed a user-friendly dashboard for task management, approvals, and progress tracking. Implemented role-based access control (RBAC) for secure and organized process handling. Integrated real-time notifications and reporting tools for monitoring process performance.
